PERSONAL PROFILE

Motivated and organized Computer Science student at the Arab Open University with strong foundations in programming and front-end development. As Co-Head of the Graphic Team in the Artificial Intelligence Club, I've developed excellent communication and leadership skills. Passionate about supporting fellow students and contributing to a collaborative learning environment.

EDUCATION

Bachelor of Science in Computer Science

Arab Open University (AOU), Egypt

2023 – Present

- Completed: Programming Fundamentals Course
- Completed: Front-End Development Course

TECHNICAL SKILLS

- Programming Languages: Java, Python
- Front-end : HTML, CSS , JS , Frame Work, Bootstrap ,React

PROJECTS

Social Media Web

Developed a responsive social media web application using React. Implemented features such as user authentication,

post creation, likes, comments, and real-time feed updates. Focused on component-based architecture, state management, and delivering a smooth and interactive user experience.

E-commerce Website

Built a modern e-commerce web application using React with dynamic product listings, shopping cart functionality, and user-friendly navigation. Applied reusable components and state management to handle product data and user interactions, ensuring a seamless and responsive shopping experience

Bookmark Manager Interface

Designed and developed a responsive web interface for a Bookmark Manager using HTML, CSS, and JavaScript. Features include navigation, tabbed content, and extension installation options across multiple browsers. Focused on clean UI/UX and component structure.

Modern Café Landing Page

Built a visually appealing and responsive landing page for a modern café. Emphasized layout design, color scheme, and user experience using only HTML and CSS.

Pancake Recipe Webpage

Developed a structured and user-friendly recipe page featuring a high-quality image, ingredient list, and step-by-step preparation guide using semantic HTML and clean CSS

Responsive Login & Sign-Up Page

Created a modern, mobile-friendly login and registration page. Applied responsive design principles and styled components to enhance usability and aesthetic appeal.

EXPERIENCE & ACTIVITIES

June 2025 – August 2025 American University in Cairo (AUC) –

STEM Club, Egypt Instructor – AI, Cybersecurity & Graphics

- Delivered summer workshops and training sessions for students aged 8–18.

- Simplified Artificial Intelligence concepts through the use of visual and graphical tools to support easy understanding.

- Provided foundational knowledge in cybersecurity, focusing on online safety, data privacy, and responsible digital behavior.

- Taught graphic design basics and essential creative digital skills.

- Introduced fundamental business and entrepreneurship concepts, highlighting the role of technology in modern businesses.

Artificial Intelligence Club, AOU
